

Ambu® Baby Manikin

The hygienic lifelike baby manikin.

Key Benefits

- Patented Hygienic system
- Airway open only in sniff position
- Airway obstruction possibility
- The Ambu Baby is a lifelike manikin that simulates babies up to the age of one year.

The Idea: Making a realistic training tool

The Ambu Baby Corresponds to a real baby up to one year old. It is the youngest member of the Ambu family of traditional manikins. Teaching BLS with the Baby manikin gives a very lifelike simulation.

Our Work: Emergency training made easy

Like all Ambu BLS manikins the Ambu Baby has the patented hygienic system that eliminates the risk of cross contamination. All trainees receive their own face piece and head bag for the training. At the end of the training the face piece can be cleaned and the head back is discarded. A truly 100% hygienic way of training.

Everyone's Life: Enabling you to provide the best care

Just as in real life the airway open only when the head is properly moved into the sniff position. The instructor can simulate obstruction of the airway by an on/off slider. The Ambu baby has additional features like a realistic brachial pulse to provide a correct and realistic training. Stomach ventilation can further be checked visually.

Specifications

DIMENSIONS

Length	15.75 in. (40 cm.)
Weight	5.51 lbs. (2.5 kg.)

Ordering Specifications

ITEM NO. DESCRIPTION

256 001 000	Ambu® CPR Baby Manikin includes 5 face pieces and 100 head bags
256 000 702	Baby head bags, 100/set
