

Fortis. For flow cytometry.

Why choose our flow-validated antibodies for your R&D?

- We are vertically integrated from immunization to manufacturing and validation
- All of our antibodies are manufactured in-house
- Our antibodies pass strict validation standards

We offer everything you need to run your assay:

- Over 100 flow-validated primary antibodies
- Over 500 secondary antibodies
- Custom conjugation of primary antibodies to your choice of 14 fluorophores

Highlights from our catalog include:

- Rabbit anti-human PD-L1 Recombinant Monoclonal IgG [BLR227K] (Cat. # A700-227)
- Mouse anti-human CD3E Monoclonal IgG [UCHT1] (Cat. # A500-033A)
- Rabbit anti-human/mouse TGF-beta 1 Recombinant Monoclonal IgG [BLR195J] (Cat. # A700-195)
- Mouse anti-human Cytokeratin 18 Monoclonal IgG1 [LDK18] (Cat. # A500-035A)
- Rabbit anti-human ARID2 Recombinant Monoclonal IgG [BLR213K] (Cat. # A700-213)
