# Molecular Diagnostics

**VIASURE® Real Time PCR Detection Kits** are designed for the diagnosis of infectious diseases caused by different pathogens in human samples.

This product range is based on 5' nuclease chemistry. This technology utilizes two primers and a hydrolysis probe and exploits the exonuclease activity of Taq DNA polymerase.

During the amplification, the increase in the fluorescent signal is proportional to the quantity of target sequence present in the sample and could be measured on a wide range of Real Time PCR platforms.

**VIASURE® Real Time PCR Detection Kit** contains in each well all the necessary components for Real Time PCR assay in a stabilized format, which allows the shipment at room temperature.

Monoplex, Multiplex and Panel lyophilised assays providing maximum flexibility and compatibility with leading open system thermal cyclers.

“

The **Real Time PCR** technique aims to obtain a large number of copies of a specific DNA fragment from a minimum amount.

## Work Flow

Add 15 µl of rehydration buffer into each well (\*).

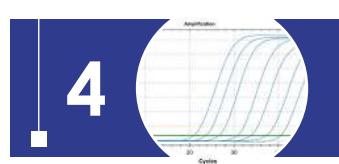

(\* ) It is recommended to include one positive and negative control in each run.

Add 5 µL of: DNA/RNA sample // or Positive control // or Negative control.

Load the strips into the thermocycler and run the specified protocol.

Interpretate results.

## ■ Gastrointestinal infections

# VIASURE Panels

Real Time PCR multiplexing panel kits detecting simultaneously viruses, bacteria or parasites.

Simultaneous detection of multiple targets in a broad range of multiplexing diagnostic panels. Flexible choice of target pathogen based for effective patient care and cost-effectiveness.

**Each panel is dedicated to a specific area of pathology.**

Example for respiratory panel disposition.

## ■ Gastrointestinal panel I <sup>(<sup>1</sup>)</sup> Ref. GP01

- *Salmonella, Campylobacter & Y. enterocolitica*
- *Shigella/EIEC*
- *Cryptosporidium, Giardia & E. histolytica*
- *Norovirus GI + GII*

## ■ Available formats

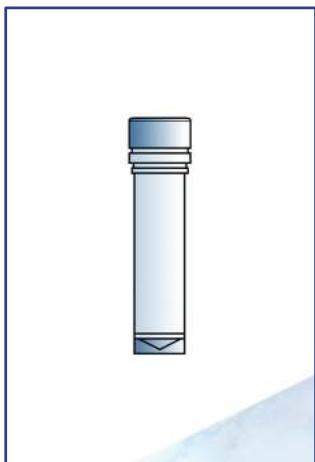

**Low profile Well**

Strip or plate available.

**High profile Well**

Strip or plate available.

**2ml Tube**

Only for Multiplex and Monoplex kits.

**Rotor-Gene Tube**

Only for Multiplex and Monoplex kits.

<sup>(1)</sup> Kit available with extraction control; <sup>(2)</sup> Research Use Only

**VIASURE** kits offer maximum flexibility and compatibility with open system thermal cyclers.
