Welcome

Genesis Diagnostics Ltd is a wholly owned subsidiary company of Omega Diagnostics Group PLC. Formed in 1994, Genesis is one of the UK's leading manufacturers of high quality ELISA based diagnostic kits. The Company specialises in the research, development and production of kits to aid the diagnosis of autoimmune and infectious diseases.

Our Products

A range of Enzyme-Linked Immunosorbent Assay (ELISA) tests for the detection and quantification of multiple diseases and conditions. All kits contain reagents which are colour-coded to ensure accurate reagent dispensing. The assays require minimal pipetting steps, making them convenient for manual processing, and the optimised incubation times ensure a quick sample turnaround without compromising performance. The Genesis ELISA range is suitable for use on open automated ELISA platforms.

Quality Assurance and Regulatory Compliance

Quality assurance is the cornerstone of the Company's success. Our quality management system was one of the first in the industry to obtain ISO 9001 and ISO 13485 certification and all aspects of the product design and manufacture are carried out in accordance with these standards.
