

ALK Analyte Control^{DR}

NEW

With WT ALK, EML4-ALK and NPM-ALK positive cell lines the new ALK Analyte Control^{DR} allows the laboratory to control for ALK assays used in lung and lymphoma. More importantly it demonstrates the appropriate sensitivity.

Available in packs of 2 or 5 pre-cut slides and microarray blocks.

Product Name	Format	Code
ALK Analyte Control ^{DR} - Four cores: • negative • positive for WT ALK • positive for EML4-ALK • positive for NPM-ALK	Slide (2)	HLC053
	Slide (5)	HLC054
	Block	HLC055

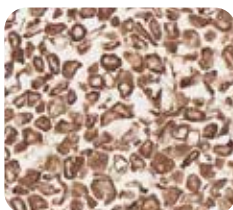

Breast
Adenocarcinoma **A**

Glioblastoma **B**

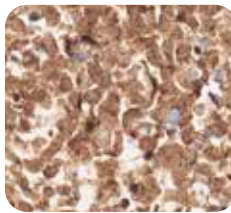

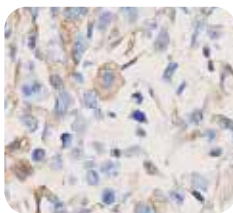

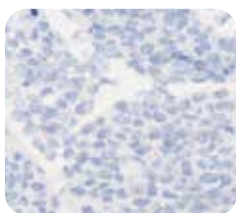

Lung
Adenocarcinoma **C**

Anaplastic
large cell lymphoma **D**

Roche/Ventana
Anti-ALK (D5F3)
Rabbit Monoclonal
Primary Antibody

Roche/Ventana
Anti-ALK (ALK01)
Mouse Monoclonal
Primary Antibody

Same slide controls are important to maintain quality in your laboratory.

We make it standardised and cost efficient.
