

TISSUEVAULT™

Cell & Tissue Freezing Bags

The OriGen Biomedical® **TISSUEVAULT** Cell & Tissue Freezing Bags are intended for use in freezing cells and tissues.

Advantages of the OriGen TissueVault

CRYOGENIC

The TissueVault is made from EVO, a proprietary co-polymer which is well-suited for long-term storage in liquid nitrogen at low temperatures down to -196°C.

BIOCOMPATIBLE

EVO co-polymer contains no plasticizers, the product's material meets biocompatibility requirements per ISO 10993 and is gamma sterilized. The TissueVault is ideal for the cryopreservation of solid tissue and bone.

EASY SEAL

The TissueVault bag seals at ~105°C and is simple to seal with any standard lab sealer. To open the bag post-thaw, simply cut below the top seal and remove the contents as needed.

TRANSLUCENT

Although the bag has a matte finish, it is translucent and allows for easy observation of the tissue through the film.

TISSUEVAULT™

Cell & Tissue Freezing Bags

The OriGen Biomedical® **TISSUEVAULT** Cell & Tissue Freezing Bags are intended for use in freezing cells and tissues.
