VirClia[®] Lotus

Any test, any sample, any time

RANDOM ACCESS, CONTINUOUS LOADING

VirClia[®] Lotus accepts any combination of samples and reagents, regardless of the instrument status. Even while running, it remains accessible for reagent and sample addition.

POSITIVE IDENTIFICATION OF SAMPLES & STRIPS

VirClia[®] Lotus built-in scanner allows for full traceability of both samples and strips, avoiding clerical errors.

STAT FUNCTION

Urgent samples can be prioritized. With VirClia[®] Lotus, STAT test requests are given the highest priority for processing.

TOTAL FLEXIBILITY

This true monostest solution allows the laboratory to run low-volume infectious serology tests daily, alongside the laboratory routine. VirClia[®] Lotus unifies in just one CLIA system, all those parameters typically performed with ELISA, IFA or Rapid Tests.

EXCELLENT TURNAROUND TIME

Results appear as soon as they are processed. The first results are available within 70 minutes and then, every 35 seconds thereafter.

The system is able to process 40 tests in 90 minutes. VirClia[®] Lotus holds up to 79 different monostests on-board and 50 primary sample tubes.

SAMPLE PRIMARY TUBES

Save hands-on-time using primary tubes (11-16 mm) directly in VirClia[®] Lotus, avoiding the inconvenience of transferring samples or performing external predilutions.
