Chemiluminescence in Monotest

The perfect combination for infectious serology

VirClia® Monotest

And the automated solutions adapted to you

VirClia® is the ultimate chemiluminescence solution for the automation of infectious serology in monotest format. Thanks to its versatility and the wide range of products available, clinical laboratories can process their analysis on a daily basis, without the need to accumulate samples or refer them to outside centers.

All tests are automatically processed on the VirClia® and VirClia® Plus instruments with the exclusive VirClia® software.

Main features

- Works with primary sample tubes
- Ideal for urgent samples and low-medium number of tests
- Completely versatile, custom setup of different assays
- Barcode reading of samples and reagents
- Intuitive and easy to use software
- LIS Connection

Each monotest contains ready to use reagents including a Calibrator and a Negative Control to enable validation and interpretation for each individual sample and for each test.

1 strip = 1 test
