

The revolution is here!

i-Tracker for Therapeutic Drug Monitoring

i-Tracker 

Abacus dx is pleased to launch **Theradiag i-Tracker on the IDS iSYS** - the first fully automated, random-access platform for Therapeutic Drug Monitoring (TDM).

Theradiag have joined forces with IDS to create a TDM first:

- **1st** random-access solution with continuous loading for the therapeutic follow-up of patients treated with biotherapies
- **1st** solution combining the latest generation chemiluminescence instrument with i-Tracker drug and anti-drug antibody assays
- **1st** solution with unparalleled turn-around times for measurement of biotherapies to allow clinicians to quickly adjust treatment

Theradiag i-Tracker on the IDS iSYS

The first fully automated, random-access platform for Therapeutic Drug Monitoring (TDM)

Theradiag i-Tracker on the IDS iSYS allows for a high quality and cost-effective solution to manage chronic inflammatory diseases including inflammatory bowel disease (Crohn's disease and ulcerative colitis), with a comprehensive panel of biotherapies for improved clinical outcomes.

Theradiag is the market leader in Therapeutic Drug Monitoring with assays validated and supported by the pharmaceutical industry.
